

MTX Postharvest

Position Title: Installation Technician

Position Type: Full Time

We are currently looking for a professional and experienced individual to add to our team.

Major Duties

- Contribute to the installation and construction of proprietary MTX systems
- Fabricate, build and assemble system components
- Interact regularly with office staff regarding site progress, requirements, materials required, and scheduling.
- Troubleshoot, test and commission projects and (or) equipment

Specific Responsibilities:

- Be an ambassador for MTX on customer sites, providing efficient and quality installation of systems
- Actively participate in the construction process and ensure project deadlines are achieved
- Ensure projects are completed as per commitments and schedules
- Work with customers, project managers, designers and trades to provide the customer with functional systems
- Proactively recognize site requirements ensuring adequate time is allotted for acquiring materials for works to be completed.
- Be receptive to both internal and external training personnel
- Perform preventative maintenance assessments, service and training as required
- Proficiently fill out service records, work orders, expense reports, etc.
- Dedication to improving the level of service and installations provided by MTX
- Continuation of development and learning in the construction and automation field either independently or in a team environment.
- Follow all safety procedures according to MTX's Health and Safety policies in addition to any customer specific Health and Safety procedures
- Travelling required

Qualifications:

- Post secondary diploma would be an asset
- Fall arrest training
- Aerial platform and boom licensing
- WHMIS training
- Proficient with hand tools
- Willing to learn

Experience:

- Minimum 3-5 years experience in construction or assembly of electrical/mechanical systems
